S^D NVT Summer 2026 info sheet

Students can attend a full or half day program for up to 30 days this summer. Our goals are to serve students in their school-based programs and surrounding communities when possible and appropriate. Additionally, we want to provide opportunities for students to join group-based activities at our South Burlington/Williston or Georgia/Fairfax locations.

General Structure

The daily structure will allow students to attend school-based programs when they are available and then transition to group-based activities to work on therapeutic goals and with opportunities for social and emotional learning in the afternoon. The afternoons will take place at one of our locations. Behavior Analyst will provide oversight of day-to-day treatment, data collection and analysis, staff supervision and a progress report at the end of the program. The group-based learning with opportunities for social and emotional learning will be designed with consultation from a Special Educator.

When students do not attend school-based programs (either for certain days within the summer or for the duration of the summer program) we ask that all IEP goals typically addressed by school-based service providers are outlined and materials provided to our team to help with continuity. Special Education consultation will be available for all students.

Transportation from schools to our locations can be provided (release of liability form must be completed), as well as transportation to community locations for additional activities as part of the group-based afternoon program.

Specific logistics

Please meet with your Behavior Analyst to work out specific logistics for your team regarding the schedule, services, transportation, etc. Our goal is to be flexible enough to meet each student's needs while maintaining the structure that allows us to maximize the use of our resources and support. Thank you in advance for your understanding.

If schools are not physically available for students to work on their IEP goals in the mornings, we can provide a workstation within a group setting at one of our locations.

We ask schools to provide lunch for students receiving a full day of programming, we can be creative in how to get them from school cafeterias. If it is not possible for students to get lunch for their school, we are able to provide lunch for an additional cost. Lunch will be scheduled daily at our locations.

If transportation to and from school is not available through typical school supports or by the family, SD may be able to accommodate this need on a case-by-case basis.
